- JS
- Vite
- JavaScript
- GIT
- Python
- C++/C#

AWARDS

Awarded to Amanturlly Yernur from G3(group) for outstanding achievement in mathematics. 2024-2025

PROFILE

I am a university student at AITU and an aspiring AI Developer. I have a strong interest in programming, mathematics, and artificial intelligence. My goal is to develop my technical skills, gain practical experience, and create useful technologies.

JOURNEY PATH

AITU
2025 – 2028

Finally, I became a university student. A new chapter of my life began, filled with responsibility, challenges, and opportunities. I knew that university life would be difficult, but I was ready to work hard, gain new knowledge, and grow as a person.

I-pro
2024 – 2025

For a year and a half, I studied to become a Frontend Developer. During this time, I learned HTML, CSS, JavaScript, and React. This experience laid the foundation for my understanding of programming and taught me how to solve problems and build real projects. It also helped me become more disciplined and confident in my skills.

Intellectual Generation School
2024-2025

This was the period when I became more responsible, mature, and intelligent. I was preparing for the entrance exam to get into AITU. Thankfully, I passed the exam and was admitted to the university. I am currently studying there.
